

COMPANY PROFILE

HARI KAILASH MEDIA PVT. LTD

*Web Design & Development Firm specializing in
Software development, web-based enterprise solutions,
web application and portal development.*

INSPIRE CHOICE

At Vapour Soft the IT in INSPIRE CHOICE stand for Innovative Thinking . The most powerful feature of the human mind Innovative Thinking is also what enables an organization like ours to rise above the routine, the expected and the usual. And come up with groundbreaking solutions that add value to our products and services while empowering our clients to soar above the rest in a highly competitive field.

Know Us

We take pleasure in introducing us as an upcoming info-media company. Vapour Soft takes interest in IT product making & training especially for education & non-government institutions. We undertake website designing, development, domain name booking and hosting, thus providing one stop solution for getting web presence. We also provide third party ready to install packages, offering multiple and infinite possibilities for customization.

The Company has been working with full strength from the last two years. Our Strengths lies in experience of creating more than 30 portals and managing more than 100 portals both with the company's clients. We develop websites in all languages including JAVA, ASP, ASP.NET, PHP, Perl and Ruby hosted on Windows and Linux servers and few also have capabilities of FFMPEG and advanced technologies required for setting up a personal YouTube!. We engage contract based domain specific talent to deliver exactly what the clients demand. Our pricing is highly competitive and we try and offer the best service through practices like round the clock phone support.

Other than the normal web products, we also provide CRM, SFA and 100% customized on demand websites/portals, build from scratch, conceptualized around the very seed of thought from the source.

Apart from development and hosting, we ensure that our clients achieve the desired return on investment by providing search engine optimizing (SEO), SEM and SMO services, post development services such as end user training, annual maintenance and audit reports elaborating the real use of the solution in the system.

First time in India we are introducing dedicated YouTube like websites, live Broadcasting, and Archived Streaming products. These products have the capacity to change the way Indian Education System works. Not only the educational programs but even corporate training lessons can be stored and streamed later, resulting in savings on huge training costs.

Working with Vapour Soft is straight forward

Discuss the Project

We evaluate the mock-up, site map and spec then decide on the best tools and techniques for the project. We estimate the cost and if you are happy, we set up the online project manager so you can stay in touch from anywhere in the world.

Start Developing

Now we are ready to put on our coding hats and start crafting a site based on the mock-up, site map and specification brief. Along the way we make sure the site is accessible, semantic and cross browser compatible. That includes Internet Explorer!

Test the site

The client is happy and has signed off on the project. We can even upload the site and make sure it's working.

Project Handover

The client is happy and has signed off on the project. We can even upload the site and make sure it's working.
